PROFESSIONAL SUMMARY

AI trainer, revenue operator and systems builder with paid LLM-evaluation experience and 15+ years leading sales and marketing teams. Has owned pipelines, hiring, training, lead acquisition, CRM administration, data quality, client and finance-partner relationships, internal app development and performance reporting. Builds production web applications that turn operational needs into reliable workflows.

CORE CAPABILITIES

AI Evaluation & Training: LLM response evaluation, preference ranking, rubric-based assessment, instruction adherence, factual accuracy, reasoning analysis, prompt refinement

Revenue & GTM Operations: Sales leadership, hiring, training, lead acquisition, pipeline ownership, CRM administration, lead routing, lifecycle governance, data deduplication, performance analysis

Systems & App Development: TypeScript, React, Next.js, Convex, Supabase/Postgres, OpenAI API, internal applications, workflow automation, testing & CI

PROFESSIONAL EXPERIENCE

AI Trainer & LLM Evaluator – DataAnnotation

May 2026 - Present

Independent Contractor | Remote

- Evaluate AI-generated responses across coding, factuality and comparative projects for correctness, instruction adherence, reasoning and clarity.
- Design coding and workplace prompts that test model behavior across interaction modes, edge cases and real-world constraints.
- Compare outputs, identify unsupported claims and reasoning failures and write evidence-based preference rationales.

Sales & Marketing Director

Oct 2022 - May 2026

Nusun and TriSMART Solar | Central Texas

- Led regional sales and marketing teams with ownership of hiring, training, pipeline execution, lead acquisition, client and finance-partner relationships and performance management.
- Built Nusun's first division app and managed CRM controls, lead routing, data quality, sales tracking and performance analysis.
- Increased monthly lead volume from ~150 to ~600 while eliminating an estimated 15-20 hours of manual work each week.

Sales & Marketing Director

Aug 2018 - Oct 2022

Vivint | Central Texas

- Led a large regional team and owned recruiting, training, pipeline operations, lead acquisition, client and finance-partner relationships and performance management.
- Built division applications and managed CRM, lead routing, data quality, sales tracking, product training and field tools.

Store Manager & Property Operations

Mar 2015 - Aug 2018

Credit World / Tire World | San Angelo, TX

- Managed retail sales, staffing, hiring, training, inventory, cash controls, customer relationships and daily store performance.
- Simultaneously operated an apartment complex for the original owner, balancing resident issues, financial controls and priorities across both businesses.

Earlier roles: Security Technician, Ener-Tel; Lead Sales Consultant, Sears; Lead Broker/Supervisor, EZCorp (2010-2014).

SELECTED TECHNICAL PROJECTS

MK Workbench – Job-to-Invoice Operations

React | TypeScript | Convex | OpenAI API | jsPDF | Playwright | Vitest | Vercel

- Built and deployed a private, mobile-ready job-to-invoice platform used in production by a plumbing business, covering intake, document review, job records, invoice drafting, PDF generation and archive.
- Built a Convex-backed workflow with server-enforced Admin, Worker and Developer roles, customer matching, source cleanup and a full audit trail.
- Integrated OpenAI image extraction behind a human review gate, with GitHub Actions, Vitest, Playwright and production safeguards.

Insight – Field Workflow App

Next.js | TypeScript | Convex | Leaflet | Papa Parse | Playwright

- Built a mobile-first lead and appointment tracker with map workflows, live location, CSV import, editable records and quick field actions.
- Modeled lead and appointment states in Convex with event history, rollups and duplicate-aware batched imports.
- Added revocable public visit cards, open tracking and route-level smoke tests.

Memorex – Agent Memory Infrastructure

Next.js | React | TypeScript | Tailwind | Vitest | Playwright | Postgres

- Built a persistent memory layer that records decisions, issues and checkpoints and compiles cited context for later agent runs.
- Implemented deterministic retrieval across local JSON and PostgreSQL storage with stable ranking and cited source expansion.
- Built task lifecycle capture, project and repository scoping, Codex integration and compact handoff context for later runs.

Additional Builds

Next.js | Supabase/Postgres | React | TypeScript | Vite | PDFKit | Vercel

- Built a role-aware sales proposal generator with uploads, e-signatures and PDF output, plus a roof-pitch estimator and deployed portfolio site.

CERTIFICATIONS & TRAINING

Introduction to Large Language Models - LinkedIn Learning | August 2026

PMI: 1.25 PDUs/contact hours | NASBA: 2.40 CPE credits (Information Technology)

Break into AI: Data Annotation Essentials - LinkedIn Learning | August 2026

TECHNICAL SKILLS

AI & Evaluation: LLM evaluation, RLHF, atomic rubric design, comparison & ranking, instruction adherence, factuality review, reasoning analysis, prompt refinement, structured extraction

Development: JavaScript, TypeScript, React, Next.js, Convex, Supabase, Postgres, REST APIs, OpenAI API, webhooks, Python

Testing & Delivery: Playwright, Vitest, Testing Library, Git, GitHub Actions, Vercel, acceptance criteria, smoke testing, code review
