PROFESSIONAL SUMMARY

AI trainer and LLM evaluator with paid experience reviewing coding, factuality, and comparative tasks and a Google AI Professional Certificate. Combines software development with sales and operations experience to design realistic prompts, identify unsupported claims and reasoning failures, and explain evaluation decisions. Builds production applications and agent memory tools.

AI EVALUATION EXPERIENCE

AI Trainer & LLM Evaluator

DataAnnotation | Independent Contractor | Remote | May 2026 - Present

- Evaluated hundreds of AI-generated responses across coding, factuality, and comparative projects for correctness, instruction adherence, reasoning, and clarity.
- Design coding and workplace prompts that test model behavior against real-world constraints, edge cases, and interaction requirements.
- Design evaluation rubrics and individual criteria to assess model responses against task requirements.
- Compare model outputs, identify unsupported claims and reasoning failures, and write evidence-based rationales for preference rankings.
- Recognized by the internal team as one of the top workers for consistently high-quality evaluation work.

SELECTED TECHNICAL PROJECTS

MK Workbench - Job-to-Invoice Operations

React | TypeScript | Convex | OpenAI API | Vitest | Playwright | Vercel

- Built and deployed a private, mobile-ready application used in production by a plumbing business, covering intake, document review, job records, invoice drafting, PDF generation, and archive.
- Integrated AI image extraction with required human review, server-enforced user roles, customer matching, and an audit trail.
- Added automated tests, GitHub Actions, and production safeguards to support reliable delivery.

Memorex - Agent Memory Infrastructure

Next.js | React | TypeScript | PostgreSQL | Vitest | Playwright

- Built a persistent memory layer that records decisions, issues, and checkpoints and compiles cited context for later agent runs.
- Implemented deterministic retrieval across local JSON and PostgreSQL storage with stable ranking and cited source expansion.
- Built task lifecycle capture, project and repository scoping, Codex integration, and compact handoff context.

ADDITIONAL TECHNICAL PROJECT

Insight - Field Workflow App

Next.js | TypeScript | Convex | Leaflet | Playwright

- Built a mobile-first lead and appointment tracker with maps, live location, CSV import, editable records, and quick field actions.
- Added event history, rollups, duplicate-aware imports, revocable public visit cards, and route-level smoke tests.

SALES & OPERATIONS EXPERIENCE

Sales & Marketing Director

Nusun and TriSMART Solar | Central Texas | Oct 2022 - May 2026

- Led regional sales and marketing teams, owning hiring, training, lead acquisition, pipeline execution, client and finance-partner relationships, and performance management.
- Built Nusun's first division app and managed CRM controls, lead routing, data quality, sales tracking, and performance analysis.
- Increased monthly lead volume from approximately 150 to 600 while eliminating an estimated 15-20 hours of manual work each week.

Sales & Marketing Director

Vivint | Central Texas | Aug 2018 - Oct 2022

- Led regional recruiting, training, sales pipeline operations, lead acquisition, and performance management.
- Built division applications and managed CRM workflows, lead routing, data quality, sales tracking, product training, and field tools.

Store Manager & Property Operations

Credit World / Tire World | San Angelo, TX | Mar 2015 - Aug 2018

- Managed retail sales, staffing, hiring, training, inventory, cash controls, and daily store performance while also operating an apartment complex for its original owner.

Earlier experience (2010-2014): Security Technician, Ener-Tel; Lead Sales Consultant, Sears; Lead Broker/Supervisor, EZCorp.

SKILLS

AI Evaluation: LLM response evaluation, comparison and preference ranking, rubric-based assessment, instruction adherence, factuality review, reasoning analysis, prompt design and refinement, structured extraction

Development: JavaScript, TypeScript, React, Next.js, Convex, Supabase, PostgreSQL, REST APIs, OpenAI API, webhooks, Python

Testing & Delivery: Playwright, Vitest, Testing Library, Git, GitHub Actions, Vercel, acceptance criteria, smoke testing, code review

Operations: Sales leadership, hiring and training, pipeline ownership, CRM administration, lead routing, data quality, workflow automation, performance analysis

CERTIFICATIONS & TRAINING

Google AI Professional Certificate - Google / Coursera | September 2026
coursera.org/verify/professional-cert/II1LEJTA8C4N

Advanced Prompt Engineering Techniques - LinkedIn Learning | August 2026

Introduction to Large Language Models - LinkedIn Learning | August 2026

Break into AI: Data Annotation Essentials - LinkedIn Learning | August 2026
